

Class 4 CBSE Mathematics - Complete Learning Book

Chapter 1: Large Numbers

Concept 1

This section explains large numbers with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Large Numbers.
2. Practice problem related to Large Numbers.
3. Practice problem related to Large Numbers.
4. Practice problem related to Large Numbers.
5. Practice problem related to Large Numbers.
6. Practice problem related to Large Numbers.
7. Practice problem related to Large Numbers.
8. Practice problem related to Large Numbers.
9. Practice problem related to Large Numbers.
10. Practice problem related to Large Numbers.

Concept 2

This section explains large numbers with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Large Numbers.
2. Practice problem related to Large Numbers.
3. Practice problem related to Large Numbers.
4. Practice problem related to Large Numbers.
5. Practice problem related to Large Numbers.
6. Practice problem related to Large Numbers.
7. Practice problem related to Large Numbers.
8. Practice problem related to Large Numbers.
9. Practice problem related to Large Numbers.
10. Practice problem related to Large Numbers.

Concept 3

This section explains large numbers with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Large Numbers.
2. Practice problem related to Large Numbers.
3. Practice problem related to Large Numbers.
4. Practice problem related to Large Numbers.
5. Practice problem related to Large Numbers.
6. Practice problem related to Large Numbers.
7. Practice problem related to Large Numbers.
8. Practice problem related to Large Numbers.
9. Practice problem related to Large Numbers.
10. Practice problem related to Large Numbers.

Concept 4

This section explains large numbers with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Large Numbers.
2. Practice problem related to Large Numbers.
3. Practice problem related to Large Numbers.
4. Practice problem related to Large Numbers.
5. Practice problem related to Large Numbers.
6. Practice problem related to Large Numbers.
7. Practice problem related to Large Numbers.
8. Practice problem related to Large Numbers.
9. Practice problem related to Large Numbers.
10. Practice problem related to Large Numbers.

Chapter 2: Addition and Subtraction

Concept 1

This section explains addition and subtraction with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Addition and Subtraction.
2. Practice problem related to Addition and Subtraction.
3. Practice problem related to Addition and Subtraction.
4. Practice problem related to Addition and Subtraction.
5. Practice problem related to Addition and Subtraction.
6. Practice problem related to Addition and Subtraction.
7. Practice problem related to Addition and Subtraction.
8. Practice problem related to Addition and Subtraction.
9. Practice problem related to Addition and Subtraction.
10. Practice problem related to Addition and Subtraction.

Concept 2

This section explains addition and subtraction with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Addition and Subtraction.
2. Practice problem related to Addition and Subtraction.
3. Practice problem related to Addition and Subtraction.
4. Practice problem related to Addition and Subtraction.
5. Practice problem related to Addition and Subtraction.
6. Practice problem related to Addition and Subtraction.
7. Practice problem related to Addition and Subtraction.
8. Practice problem related to Addition and Subtraction.
9. Practice problem related to Addition and Subtraction.
10. Practice problem related to Addition and Subtraction.

Concept 3

This section explains addition and subtraction with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Addition and Subtraction.
2. Practice problem related to Addition and Subtraction.
3. Practice problem related to Addition and Subtraction.
4. Practice problem related to Addition and Subtraction.
5. Practice problem related to Addition and Subtraction.
6. Practice problem related to Addition and Subtraction.
7. Practice problem related to Addition and Subtraction.
8. Practice problem related to Addition and Subtraction.
9. Practice problem related to Addition and Subtraction.
10. Practice problem related to Addition and Subtraction.

Concept 4

This section explains addition and subtraction with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Addition and Subtraction.
2. Practice problem related to Addition and Subtraction.
3. Practice problem related to Addition and Subtraction.
4. Practice problem related to Addition and Subtraction.
5. Practice problem related to Addition and Subtraction.
6. Practice problem related to Addition and Subtraction.
7. Practice problem related to Addition and Subtraction.
8. Practice problem related to Addition and Subtraction.
9. Practice problem related to Addition and Subtraction.
10. Practice problem related to Addition and Subtraction.

Chapter 3: Multiplication

Concept 1

This section explains multiplication with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Multiplication.
2. Practice problem related to Multiplication.
3. Practice problem related to Multiplication.
4. Practice problem related to Multiplication.
5. Practice problem related to Multiplication.
6. Practice problem related to Multiplication.
7. Practice problem related to Multiplication.
8. Practice problem related to Multiplication.
9. Practice problem related to Multiplication.
10. Practice problem related to Multiplication.

Concept 2

This section explains multiplication with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Multiplication.
2. Practice problem related to Multiplication.
3. Practice problem related to Multiplication.
4. Practice problem related to Multiplication.
5. Practice problem related to Multiplication.
6. Practice problem related to Multiplication.
7. Practice problem related to Multiplication.
8. Practice problem related to Multiplication.
9. Practice problem related to Multiplication.
10. Practice problem related to Multiplication.

Concept 3

This section explains multiplication with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Multiplication.
2. Practice problem related to Multiplication.
3. Practice problem related to Multiplication.
4. Practice problem related to Multiplication.
5. Practice problem related to Multiplication.
6. Practice problem related to Multiplication.
7. Practice problem related to Multiplication.
8. Practice problem related to Multiplication.
9. Practice problem related to Multiplication.
10. Practice problem related to Multiplication.

Concept 4

This section explains multiplication with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Multiplication.
2. Practice problem related to Multiplication.
3. Practice problem related to Multiplication.
4. Practice problem related to Multiplication.
5. Practice problem related to Multiplication.
6. Practice problem related to Multiplication.
7. Practice problem related to Multiplication.
8. Practice problem related to Multiplication.
9. Practice problem related to Multiplication.
10. Practice problem related to Multiplication.

Chapter 4: Division

Concept 1

This section explains division with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Division.
2. Practice problem related to Division.
3. Practice problem related to Division.
4. Practice problem related to Division.
5. Practice problem related to Division.
6. Practice problem related to Division.
7. Practice problem related to Division.
8. Practice problem related to Division.
9. Practice problem related to Division.
10. Practice problem related to Division.

Concept 2

This section explains division with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Division.
2. Practice problem related to Division.
3. Practice problem related to Division.
4. Practice problem related to Division.
5. Practice problem related to Division.
6. Practice problem related to Division.
7. Practice problem related to Division.
8. Practice problem related to Division.
9. Practice problem related to Division.
10. Practice problem related to Division.

Concept 3

This section explains division with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Division.
2. Practice problem related to Division.
3. Practice problem related to Division.
4. Practice problem related to Division.
5. Practice problem related to Division.
6. Practice problem related to Division.
7. Practice problem related to Division.
8. Practice problem related to Division.
9. Practice problem related to Division.
10. Practice problem related to Division.

Concept 4

This section explains division with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Division.
2. Practice problem related to Division.
3. Practice problem related to Division.
4. Practice problem related to Division.
5. Practice problem related to Division.
6. Practice problem related to Division.
7. Practice problem related to Division.
8. Practice problem related to Division.
9. Practice problem related to Division.
10. Practice problem related to Division.

Chapter 5: Factors and Multiples

Concept 1

This section explains factors and multiples with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Factors and Multiples.
2. Practice problem related to Factors and Multiples.
3. Practice problem related to Factors and Multiples.
4. Practice problem related to Factors and Multiples.
5. Practice problem related to Factors and Multiples.
6. Practice problem related to Factors and Multiples.
7. Practice problem related to Factors and Multiples.
8. Practice problem related to Factors and Multiples.
9. Practice problem related to Factors and Multiples.
10. Practice problem related to Factors and Multiples.

Concept 2

This section explains factors and multiples with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Factors and Multiples.
2. Practice problem related to Factors and Multiples.
3. Practice problem related to Factors and Multiples.
4. Practice problem related to Factors and Multiples.
5. Practice problem related to Factors and Multiples.
6. Practice problem related to Factors and Multiples.
7. Practice problem related to Factors and Multiples.
8. Practice problem related to Factors and Multiples.
9. Practice problem related to Factors and Multiples.
10. Practice problem related to Factors and Multiples.

Concept 3

This section explains factors and multiples with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Factors and Multiples.
2. Practice problem related to Factors and Multiples.
3. Practice problem related to Factors and Multiples.
4. Practice problem related to Factors and Multiples.
5. Practice problem related to Factors and Multiples.
6. Practice problem related to Factors and Multiples.
7. Practice problem related to Factors and Multiples.
8. Practice problem related to Factors and Multiples.
9. Practice problem related to Factors and Multiples.
10. Practice problem related to Factors and Multiples.

Concept 4

This section explains factors and multiples with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Factors and Multiples.
2. Practice problem related to Factors and Multiples.
3. Practice problem related to Factors and Multiples.
4. Practice problem related to Factors and Multiples.
5. Practice problem related to Factors and Multiples.
6. Practice problem related to Factors and Multiples.
7. Practice problem related to Factors and Multiples.
8. Practice problem related to Factors and Multiples.
9. Practice problem related to Factors and Multiples.
10. Practice problem related to Factors and Multiples.

Chapter 6: Fractions

Concept 1

This section explains fractions with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Fractions.
2. Practice problem related to Fractions.
3. Practice problem related to Fractions.
4. Practice problem related to Fractions.
5. Practice problem related to Fractions.
6. Practice problem related to Fractions.
7. Practice problem related to Fractions.
8. Practice problem related to Fractions.
9. Practice problem related to Fractions.
10. Practice problem related to Fractions.

Concept 2

This section explains fractions with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Fractions.
2. Practice problem related to Fractions.
3. Practice problem related to Fractions.
4. Practice problem related to Fractions.
5. Practice problem related to Fractions.
6. Practice problem related to Fractions.
7. Practice problem related to Fractions.
8. Practice problem related to Fractions.
9. Practice problem related to Fractions.
10. Practice problem related to Fractions.

Concept 3

This section explains fractions with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Fractions.
2. Practice problem related to Fractions.
3. Practice problem related to Fractions.
4. Practice problem related to Fractions.
5. Practice problem related to Fractions.
6. Practice problem related to Fractions.
7. Practice problem related to Fractions.
8. Practice problem related to Fractions.
9. Practice problem related to Fractions.
10. Practice problem related to Fractions.

Concept 4

This section explains fractions with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Fractions.
2. Practice problem related to Fractions.
3. Practice problem related to Fractions.
4. Practice problem related to Fractions.
5. Practice problem related to Fractions.
6. Practice problem related to Fractions.
7. Practice problem related to Fractions.
8. Practice problem related to Fractions.
9. Practice problem related to Fractions.
10. Practice problem related to Fractions.

Chapter 7: Decimals

Concept 1

This section explains decimals with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Decimals.
2. Practice problem related to Decimals.
3. Practice problem related to Decimals.
4. Practice problem related to Decimals.
5. Practice problem related to Decimals.
6. Practice problem related to Decimals.
7. Practice problem related to Decimals.
8. Practice problem related to Decimals.
9. Practice problem related to Decimals.
10. Practice problem related to Decimals.

Concept 2

This section explains decimals with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Decimals.
2. Practice problem related to Decimals.
3. Practice problem related to Decimals.
4. Practice problem related to Decimals.
5. Practice problem related to Decimals.
6. Practice problem related to Decimals.
7. Practice problem related to Decimals.
8. Practice problem related to Decimals.
9. Practice problem related to Decimals.
10. Practice problem related to Decimals.

Concept 3

This section explains decimals with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Decimals.
2. Practice problem related to Decimals.
3. Practice problem related to Decimals.
4. Practice problem related to Decimals.
5. Practice problem related to Decimals.
6. Practice problem related to Decimals.
7. Practice problem related to Decimals.
8. Practice problem related to Decimals.
9. Practice problem related to Decimals.
10. Practice problem related to Decimals.

Concept 4

This section explains decimals with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Decimals.
2. Practice problem related to Decimals.
3. Practice problem related to Decimals.
4. Practice problem related to Decimals.
5. Practice problem related to Decimals.
6. Practice problem related to Decimals.
7. Practice problem related to Decimals.
8. Practice problem related to Decimals.
9. Practice problem related to Decimals.
10. Practice problem related to Decimals.

Chapter 8: Measurement

Concept 1

This section explains measurement with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Measurement.
2. Practice problem related to Measurement.
3. Practice problem related to Measurement.
4. Practice problem related to Measurement.
5. Practice problem related to Measurement.
6. Practice problem related to Measurement.
7. Practice problem related to Measurement.
8. Practice problem related to Measurement.
9. Practice problem related to Measurement.
10. Practice problem related to Measurement.

Concept 2

This section explains measurement with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Measurement.
2. Practice problem related to Measurement.
3. Practice problem related to Measurement.
4. Practice problem related to Measurement.
5. Practice problem related to Measurement.
6. Practice problem related to Measurement.
7. Practice problem related to Measurement.
8. Practice problem related to Measurement.
9. Practice problem related to Measurement.
10. Practice problem related to Measurement.

Concept 3

This section explains measurement with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Measurement.
2. Practice problem related to Measurement.
3. Practice problem related to Measurement.
4. Practice problem related to Measurement.
5. Practice problem related to Measurement.
6. Practice problem related to Measurement.
7. Practice problem related to Measurement.
8. Practice problem related to Measurement.
9. Practice problem related to Measurement.
10. Practice problem related to Measurement.

Concept 4

This section explains measurement with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Measurement.
2. Practice problem related to Measurement.
3. Practice problem related to Measurement.
4. Practice problem related to Measurement.
5. Practice problem related to Measurement.
6. Practice problem related to Measurement.
7. Practice problem related to Measurement.
8. Practice problem related to Measurement.
9. Practice problem related to Measurement.
10. Practice problem related to Measurement.

Chapter 9: Time

Concept 1

This section explains time with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Time.
2. Practice problem related to Time.
3. Practice problem related to Time.
4. Practice problem related to Time.
5. Practice problem related to Time.
6. Practice problem related to Time.
7. Practice problem related to Time.
8. Practice problem related to Time.
9. Practice problem related to Time.
10. Practice problem related to Time.

Concept 2

This section explains time with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Time.
2. Practice problem related to Time.
3. Practice problem related to Time.
4. Practice problem related to Time.
5. Practice problem related to Time.
6. Practice problem related to Time.
7. Practice problem related to Time.
8. Practice problem related to Time.
9. Practice problem related to Time.
10. Practice problem related to Time.

Concept 3

This section explains time with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Time.
2. Practice problem related to Time.
3. Practice problem related to Time.
4. Practice problem related to Time.
5. Practice problem related to Time.
6. Practice problem related to Time.
7. Practice problem related to Time.
8. Practice problem related to Time.
9. Practice problem related to Time.
10. Practice problem related to Time.

Concept 4

This section explains time with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Time.
2. Practice problem related to Time.
3. Practice problem related to Time.
4. Practice problem related to Time.
5. Practice problem related to Time.
6. Practice problem related to Time.
7. Practice problem related to Time.
8. Practice problem related to Time.
9. Practice problem related to Time.
10. Practice problem related to Time.

Chapter 10: Money

Concept 1

This section explains money with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Money.
2. Practice problem related to Money.
3. Practice problem related to Money.
4. Practice problem related to Money.
5. Practice problem related to Money.
6. Practice problem related to Money.
7. Practice problem related to Money.
8. Practice problem related to Money.
9. Practice problem related to Money.
10. Practice problem related to Money.

Concept 2

This section explains money with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Money.
2. Practice problem related to Money.
3. Practice problem related to Money.
4. Practice problem related to Money.
5. Practice problem related to Money.
6. Practice problem related to Money.
7. Practice problem related to Money.
8. Practice problem related to Money.
9. Practice problem related to Money.
10. Practice problem related to Money.

Concept 3

This section explains money with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Money.
2. Practice problem related to Money.
3. Practice problem related to Money.
4. Practice problem related to Money.
5. Practice problem related to Money.
6. Practice problem related to Money.
7. Practice problem related to Money.
8. Practice problem related to Money.
9. Practice problem related to Money.
10. Practice problem related to Money.

Concept 4

This section explains money with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Money.
2. Practice problem related to Money.
3. Practice problem related to Money.
4. Practice problem related to Money.
5. Practice problem related to Money.
6. Practice problem related to Money.
7. Practice problem related to Money.
8. Practice problem related to Money.
9. Practice problem related to Money.
10. Practice problem related to Money.

Chapter 11: Geometry

Concept 1

This section explains geometry with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Geometry.
2. Practice problem related to Geometry.
3. Practice problem related to Geometry.
4. Practice problem related to Geometry.
5. Practice problem related to Geometry.
6. Practice problem related to Geometry.
7. Practice problem related to Geometry.
8. Practice problem related to Geometry.
9. Practice problem related to Geometry.
10. Practice problem related to Geometry.

Concept 2

This section explains geometry with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Geometry.
2. Practice problem related to Geometry.
3. Practice problem related to Geometry.
4. Practice problem related to Geometry.
5. Practice problem related to Geometry.
6. Practice problem related to Geometry.
7. Practice problem related to Geometry.
8. Practice problem related to Geometry.
9. Practice problem related to Geometry.
10. Practice problem related to Geometry.

Concept 3

This section explains geometry with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Geometry.
2. Practice problem related to Geometry.
3. Practice problem related to Geometry.
4. Practice problem related to Geometry.
5. Practice problem related to Geometry.
6. Practice problem related to Geometry.
7. Practice problem related to Geometry.
8. Practice problem related to Geometry.
9. Practice problem related to Geometry.
10. Practice problem related to Geometry.

Concept 4

This section explains geometry with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Geometry.
2. Practice problem related to Geometry.
3. Practice problem related to Geometry.
4. Practice problem related to Geometry.
5. Practice problem related to Geometry.
6. Practice problem related to Geometry.
7. Practice problem related to Geometry.
8. Practice problem related to Geometry.
9. Practice problem related to Geometry.
10. Practice problem related to Geometry.

Chapter 12: Perimeter and Area

Concept 1

This section explains perimeter and area with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Perimeter and Area.
2. Practice problem related to Perimeter and Area.
3. Practice problem related to Perimeter and Area.
4. Practice problem related to Perimeter and Area.
5. Practice problem related to Perimeter and Area.
6. Practice problem related to Perimeter and Area.
7. Practice problem related to Perimeter and Area.
8. Practice problem related to Perimeter and Area.
9. Practice problem related to Perimeter and Area.
10. Practice problem related to Perimeter and Area.

Concept 2

This section explains perimeter and area with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Perimeter and Area.
2. Practice problem related to Perimeter and Area.
3. Practice problem related to Perimeter and Area.
4. Practice problem related to Perimeter and Area.
5. Practice problem related to Perimeter and Area.
6. Practice problem related to Perimeter and Area.
7. Practice problem related to Perimeter and Area.
8. Practice problem related to Perimeter and Area.
9. Practice problem related to Perimeter and Area.
10. Practice problem related to Perimeter and Area.

Concept 3

This section explains perimeter and area with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Perimeter and Area.
2. Practice problem related to Perimeter and Area.
3. Practice problem related to Perimeter and Area.
4. Practice problem related to Perimeter and Area.
5. Practice problem related to Perimeter and Area.
6. Practice problem related to Perimeter and Area.
7. Practice problem related to Perimeter and Area.
8. Practice problem related to Perimeter and Area.
9. Practice problem related to Perimeter and Area.
10. Practice problem related to Perimeter and Area.

Concept 4

This section explains perimeter and area with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Perimeter and Area.
2. Practice problem related to Perimeter and Area.
3. Practice problem related to Perimeter and Area.
4. Practice problem related to Perimeter and Area.
5. Practice problem related to Perimeter and Area.
6. Practice problem related to Perimeter and Area.
7. Practice problem related to Perimeter and Area.
8. Practice problem related to Perimeter and Area.
9. Practice problem related to Perimeter and Area.
10. Practice problem related to Perimeter and Area.

Chapter 13: Data Handling

Concept 1

This section explains data handling with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Data Handling.
2. Practice problem related to Data Handling.
3. Practice problem related to Data Handling.
4. Practice problem related to Data Handling.
5. Practice problem related to Data Handling.
6. Practice problem related to Data Handling.
7. Practice problem related to Data Handling.
8. Practice problem related to Data Handling.
9. Practice problem related to Data Handling.
10. Practice problem related to Data Handling.

Concept 2

This section explains data handling with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Data Handling.
2. Practice problem related to Data Handling.
3. Practice problem related to Data Handling.
4. Practice problem related to Data Handling.
5. Practice problem related to Data Handling.
6. Practice problem related to Data Handling.
7. Practice problem related to Data Handling.
8. Practice problem related to Data Handling.
9. Practice problem related to Data Handling.
10. Practice problem related to Data Handling.

Concept 3

This section explains data handling with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Data Handling.
2. Practice problem related to Data Handling.
3. Practice problem related to Data Handling.
4. Practice problem related to Data Handling.
5. Practice problem related to Data Handling.
6. Practice problem related to Data Handling.
7. Practice problem related to Data Handling.
8. Practice problem related to Data Handling.
9. Practice problem related to Data Handling.
10. Practice problem related to Data Handling.

Concept 4

This section explains data handling with simple Class 4 level examples, step-by-step methods, and real-life applications.

Solved Example:

Read the question carefully, identify the operation, solve step-by-step, and verify the answer.

Practice Questions:

1. Practice problem related to Data Handling.
2. Practice problem related to Data Handling.
3. Practice problem related to Data Handling.
4. Practice problem related to Data Handling.
5. Practice problem related to Data Handling.
6. Practice problem related to Data Handling.
7. Practice problem related to Data Handling.
8. Practice problem related to Data Handling.
9. Practice problem related to Data Handling.
10. Practice problem related to Data Handling.
